

## Pasos

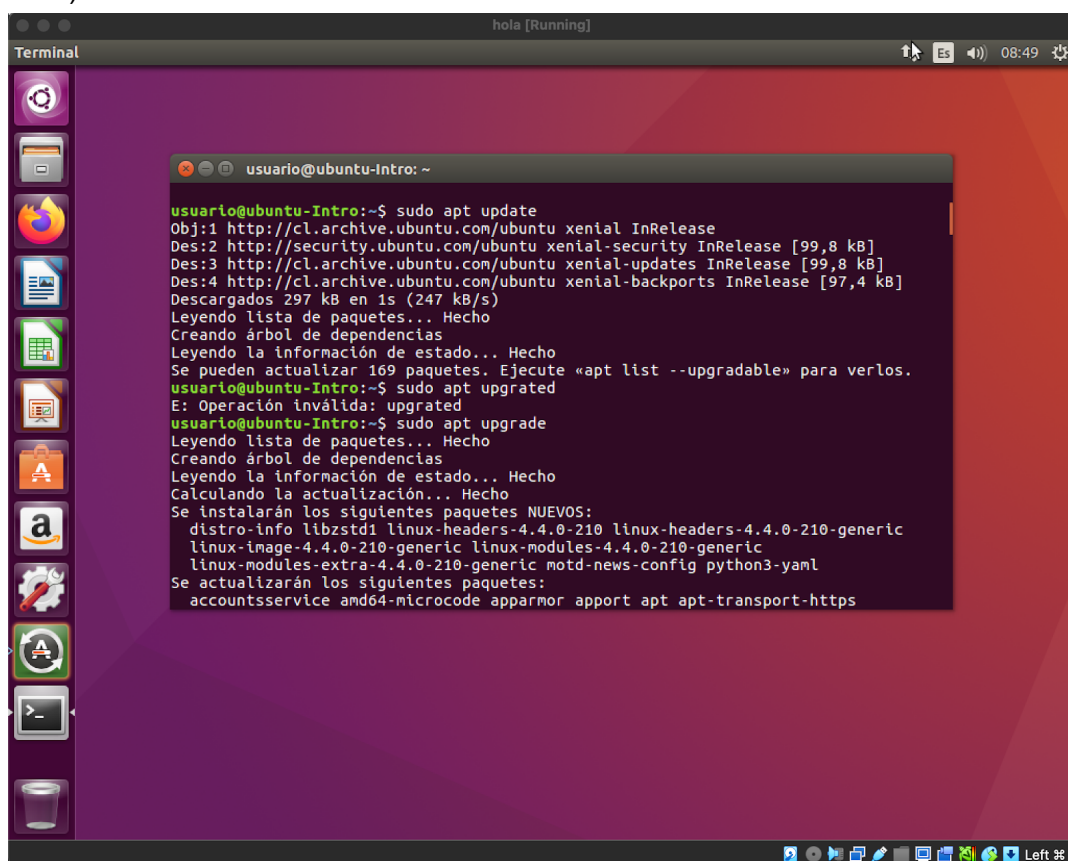

### 1) Hacer ping

The screenshot shows a terminal window titled 'Terminal' with a dark background. The prompt is 'usuario@ubuntu-intro: ~'. The user has entered the command 'ping -c 2 www.digitalhouse.com.ar'. The output shows two successful ping requests with response times of 212 ms and 288 ms. Below the output, there is a summary of the ping statistics: '--- digitalhouse.com.ar ping statistics ---', '2 packets transmitted, 2 received, 0% packet loss, time 1000ms', and 'rtt min/avg/max/mdev = 212.002/250.002/288.002/38.000 ms'. The terminal window is part of a desktop environment with a purple and red background and a sidebar of application icons.

```
usuario@ubuntu-intro: ~  
usuario@ubuntu-Intro:~$ ping -c www.digitalhouse.com.ar

### 2) Actualizar

The screenshot shows a terminal window titled 'Terminal' with a dark background. The prompt is 'usuario@ubuntu-intro: ~'. The user has entered the command 'sudo apt update'. The output shows the system checking for updates from various sources, including 'http://cl.archive.ubuntu.com/ubuntu xenial InRelease' and 'http://security.ubuntu.com/ubuntu xenial-security InRelease'. It then shows the command 'sudo apt upgrade' being executed, which results in an error 'E: Operación inválida: upgraded'. The user then enters 'sudo apt upgrade', which shows the list of packages to be upgraded, including 'distro-info', 'libzstd1', 'linux-headers-4.4.0-210', 'linux-image-4.4.0-210-generic', 'linux-modules-4.4.0-210-generic', 'linux-modules-extra-4.4.0-210-generic', 'motd-news-config', and 'python3-yaml'. The terminal window is part of a desktop environment with a purple and red background and a sidebar of application icons.
